Bachelor's Programme in Dutch Studies

In the Bachelor's Programme in Dutch Studies students will obtain:

● linguistic knowledge and communicative competence in Dutch at the academic level, which includes receptive and productive skills in written Dutch and a basic active knowledge of the spoken language

● cultural competence for understanding various aspects of Dutch culture

● general academic skills, including a competent and critical use of relevant scholarly literature.

After finishing the programme students can work in various professional fields and projects related to the Netherlands and Belgium in sectors such as tourism, international trade, administration, translation, and the media.
